Modulation Source

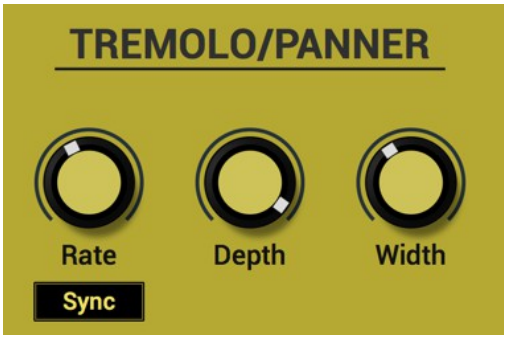

Waveform : modulation signal

Phase : phase offset of modulation signal

Smth : smoothing modulation signal

Tremolo/Pan

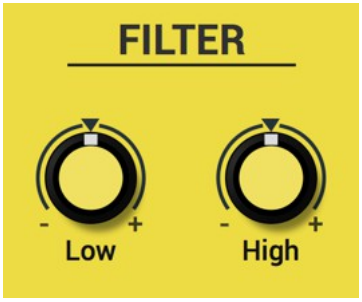

Rate: modulation speed

Depth : modulation depth

Width : if this value is 0 = tremolo
more than 0 = panner

Filter

Low : low gain

High : high gain

Output

Vol : output volume

Arrows : undo/redo
Dice : randomize parameters except output section
Eraser : initialize param values except output section
